

AGUA MENTA

Instructions for printing and mounting the tape measure

Print

Before printing, make sure that the "fit to page" or "fit to page" option in the print dialog box is disabled so that the printer does not reduce or increase the dimensions of the ribbon.

Cut

Using scissors or a stylus, cut out all the continuous black lines indicated with the "scissors" to create the tape segments.

Fold and rotate

Fold and rotate the ends (as indicated on the print) by joining the dotted lines until a single ribbon is assembled.

Fix the folds

After assembly, fix the folds of the tape using glue, adhesive tape or a stapler.
